Date of Birth: 02/09/2005

Gender: Male

Phone: (+84) 0949103246

Email: quockhanhdz295@gmail.com

Location: Da Nang, Vietnam

GitHub: CrissNguyenKhanh

SKILLS

Java / Spring Boot · REST API · Kotlin / Android · Python / Flask · React + Vite · JavaScript · MySQL · Socket.IO · OpenCV · MediaPipe · scikit-learn · JUnit / Mockito · Git / GitHub · Ubuntu · Nginx

EDUCATION

Computer Science / IT

Self-taught via online resources and public GitHub projects.

CERTIFICATION

FPT - Java Certificate (May 2025)

INTERESTS

- Reading technical blogs and architecture deep dives
- Building personal projects with practical datasets

CAREER OBJECTIVE

Software Engineer focused on backend and product-oriented engineering. Strong practical evidence across Java/Spring APIs, Python/Flask services, React interfaces, and real-time + ML-enabled workflows. Looking to contribute measurable product features in a team with clear engineering processes and code review culture.

WORK EXPERIENCE

Software Engineer (Personal Projects) 2024 - Present

Independent / Open Source

- Designed and delivered end-to-end projects: AI Driver Monitoring System, Android healthcare app, Java REST APIs.
- Applied official framework documentation (Spring, Flask, React) into production-like public codebases.
- Maintained clean Git workflow with scoped commits and feature branch practices.
- Handled architecture, validation, logging, and deployment-oriented concerns across full-stack demos.

FEATURED PROJECTS

AI Driver Monitoring System (DMS) 03/2026

github.com/CrissNguyenKhanh/AI-DRIVER-MONITORING-SYSTEM-DMS

- OpenCV + MediaPipe vision pipeline with realtime behavior signals.
- scikit-learn classifiers for scoring/classification tasks.
- Flask + Gunicorn backend, React 19 + Vite frontend, Socket.IO, MySQL, Telegram notifications.

Healthcare Mobile Suite (MyFinalProjectOfAndroid) 05/2025 - 08/2025

github.com/CrissNguyenKhanh/MyFinalProjectOfAndroid

- Kotlin Android client for appointment and user-facing healthcare flows.
- Spring Boot REST backend with JWT auth, JPA, and MySQL persistence.
- Retrofit/OkHttp + coroutines for stable API integration.

HayThucKhuya - Diagnostic Assistant 12/2025

github.com/CrissNguyenKhanh/HayThucKhuya

- Music and movies

- Gaussian Naive Bayes (scikit-learn) for symptom-based diagnostic suggestions.
- pandas/NumPy preprocessing; deployment on Ubuntu with systemd + Nginx.

Realtime Chat (RMI + Security, collaborative) 11/2025 - 12/2025

github.com/CongHien05/Chatapp_RealTime_HEHEH

- Java RMI realtime chat architecture with structured DTO exchange.
- Security-minded validation, exception handling, and auditable logging patterns.

NoobApi 05/2025

github.com/CrissNguyenKhanh/NoobApi

- Java REST API with authentication/authorization and CRUD domains.
- Layered code structure with JUnit/Mockito test coverage in project workflow.

ACHIEVEMENTS

- **2024:** Built a strong Java/backend practice base through public project delivery and documentation.
- **2025:** Delivered and deployed Naive Bayes diagnostic demo on Ubuntu with reproducible run steps.
